

Category: Wall Treatments

Company: Blumenthal Alternative Wallcovering

Product: Tesserae

Designer: Blumenthal Design

Blumenthal Alternative Wallcovering presents a completely new product for both commercial and residential use. Produced on Duraprene, the industry's first and only commercial wallcovering with a recycled fiber content, Tesserae boasts an impressive focus on sustainability, without sacrificing a bold aesthetic and smooth functionality. The large-scale, multi-hued block mosaic is fully charged with a bold mix of colors, and is one of six coordinating patterns that make up Blumenthal's new collection, Foundry. Artfully composed, hip, and full of trend, Tesserae is easy to hang and clean, Class A flame rated, and exceeds Federal Spec CCC W 408 D for tear and tensile strength.

FROM THE JURY:

"Tesserae's lively color play is great, and the large scale geometric makes it unique. The product's move toward 'green' is especially promising."
